## Mounting instruction:

- Remove the horn.
- Mount the connection strap with the listed mounting parts.
- On the outer connection points of the connection strap, in each case 2 Distance washers are mounted between strap and Frame.
- Mount the Protection Guard on the connection points loose with the listed mounting parts.
- Protection Guards aim and tighten all screws.
- **In order to avoid a damage of the fender during the assembly it is absolutely necessary to push the Protection Guard as far as possible on the Frame. In addition, solve all Fender screws and press the guard as far as possible down. Afterwards aim and tighten all screws.**
- The Distance tubes on the below connection points are mounted between Frame and Protection Guard.
- Mount the Horn.

### Care and servicing:

To reach a long live span of our chromium-plated articles they should be cleaned regularly and be treated with customary chrome care means.

With powder coated articles a regular cleaning is important. Damages (e.g. by rockfall) can be mended with colour.

By both versions we recommend about the winter the spraying or rubbing with corrosion protection oil or silicone.

All fixing bolts must be checked at regular intervals (max. 6 months).

**We wish you a lot of joy and accident-free journey with our motorcycle accessories.**
