| Product                                                      | 12 V Starter Battery, Lithium                                                                                                                                                                                                                                                        |
| Category according to article 3 of Regulation (EU) 2023/1542 | 'starting, lighting and ignition battery' or 'SLI battery' means a battery that is specifically designed to supply electric power for starting, lighting, or ignition and that can also be used for auxiliary or backup purposes in vehicles, other means of transport or machinery. |

**▼ Name and address of the manufacturer**

This declaration of conformity is issued under the sole responsibility of the manufacturer:

|           |                                              |
|-----------|----------------------------------------------|
| Company   | JM-Products                                  |
| Address   | Hammerbrookstr. 97<br>20097 Hamburg, Germany |
| Telephone | + 49 (0) 40 2 37 21-0                        |
| E-Mail    | info@jmproducts.eu                           |
| Internet  | www.jmproducts.eu                            |

**▼ Object of declaration**

The object described below complies with the relevant EU Regulation 2023/1542:

|                                |                   |
|--------------------------------|-------------------|
| Brand                          | JMT               |
| Part number                    | 707 02 18         |
| Voltage                        | 12 V              |
| Capacity                       | 8 Ah              |
| Cold cranking current          | 480 A             |
| Size (length x width x height) | 165 x 87 x 130 mm |
| Weight (ready for use)         | 2.18 kg           |
