JMC

Motorcycle Cleaner

- Multifunctional special cleaner for motorcycles
- Synergistic action surfactants with high wetting effects penetrate even coarse soiling quickly thereby facilitating their removal with sponge, brush or strong water jet.
- The gel-like consistency ensures good adhesion to the surface to be cleaned
- Contains anticorrosive components

APPLICATION

JMC Motorcycle Cleaner is a special cleaning concentrate developed for two-wheel vehicles. Due to its multifunctional properties, it is compatible with the diversity of materials encountered here side by side and dissolves any kind of soiling at the same time. The dissolved dirt can be easily removed with a sponge after a short soaking time. Special corrosion inhibitors protect blank metallic surfaces.

HOW TO USE

Just as all products of this kind, JMC Motorcycle Cleaner should not be applied in direct sunlight or on hot surfaces. JMC Motorcycle Cleaner is sprayed uniformly on the surface to be cleaned. After a soaking time of approx. 5-10 minutes, the cleaning effect can be supported with sponge or soft brush. Next, the motorcycle cleaner is thoroughly rinsed off with a moderate strength water jet. A high-pressure cleaner with maximum pressure of approx. 60 bar and maximum temperature of 30 °C can be used to assist with the process.

TECHNICAL SPECIFICATIONS

Density at 20°C (± 0.005 g/ml): 1.163 g/mL

pH concentrate (± 0.5): 8.8

Refractive index at 20°C (± 0.005): 1.381

Viscosity at 20 °C (± 5 s)

ISO cup / 4 mm: 22 s

Solubility: can be blended with water in any proportion

Minimum shelf life: 2 years when stored between 5°C and 35°C in its sealed original package. Re-seal opened packages after use.

PRECAUTIONS

Do not use on hot surfaces or in direct sunlight. Rinse out any splashes that may have entered the eyes with plenty of water.

Consult a physician if discomfort continues.

Identification: See chapter 2 of the currently applicable EC MSDS.
